

# Implementing ISA101

A Case Study: High Performance,  
High Resolution, High Availability  
HMI Upgrade

# ISA 101 Overview: The HMI of the Past

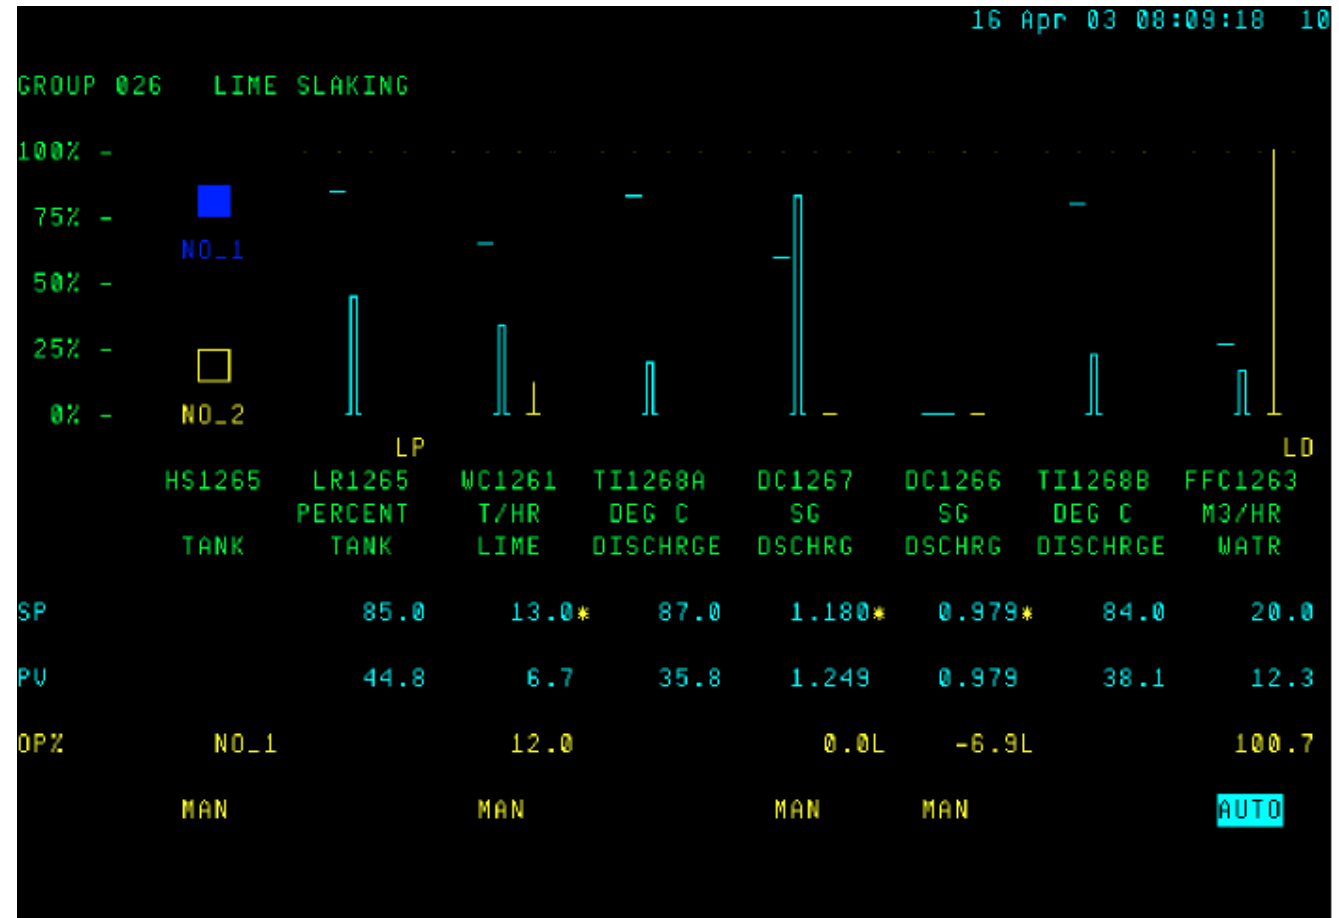

- Provided an overview of the process
- Many trends throughout

Sunday, June 25, 2017

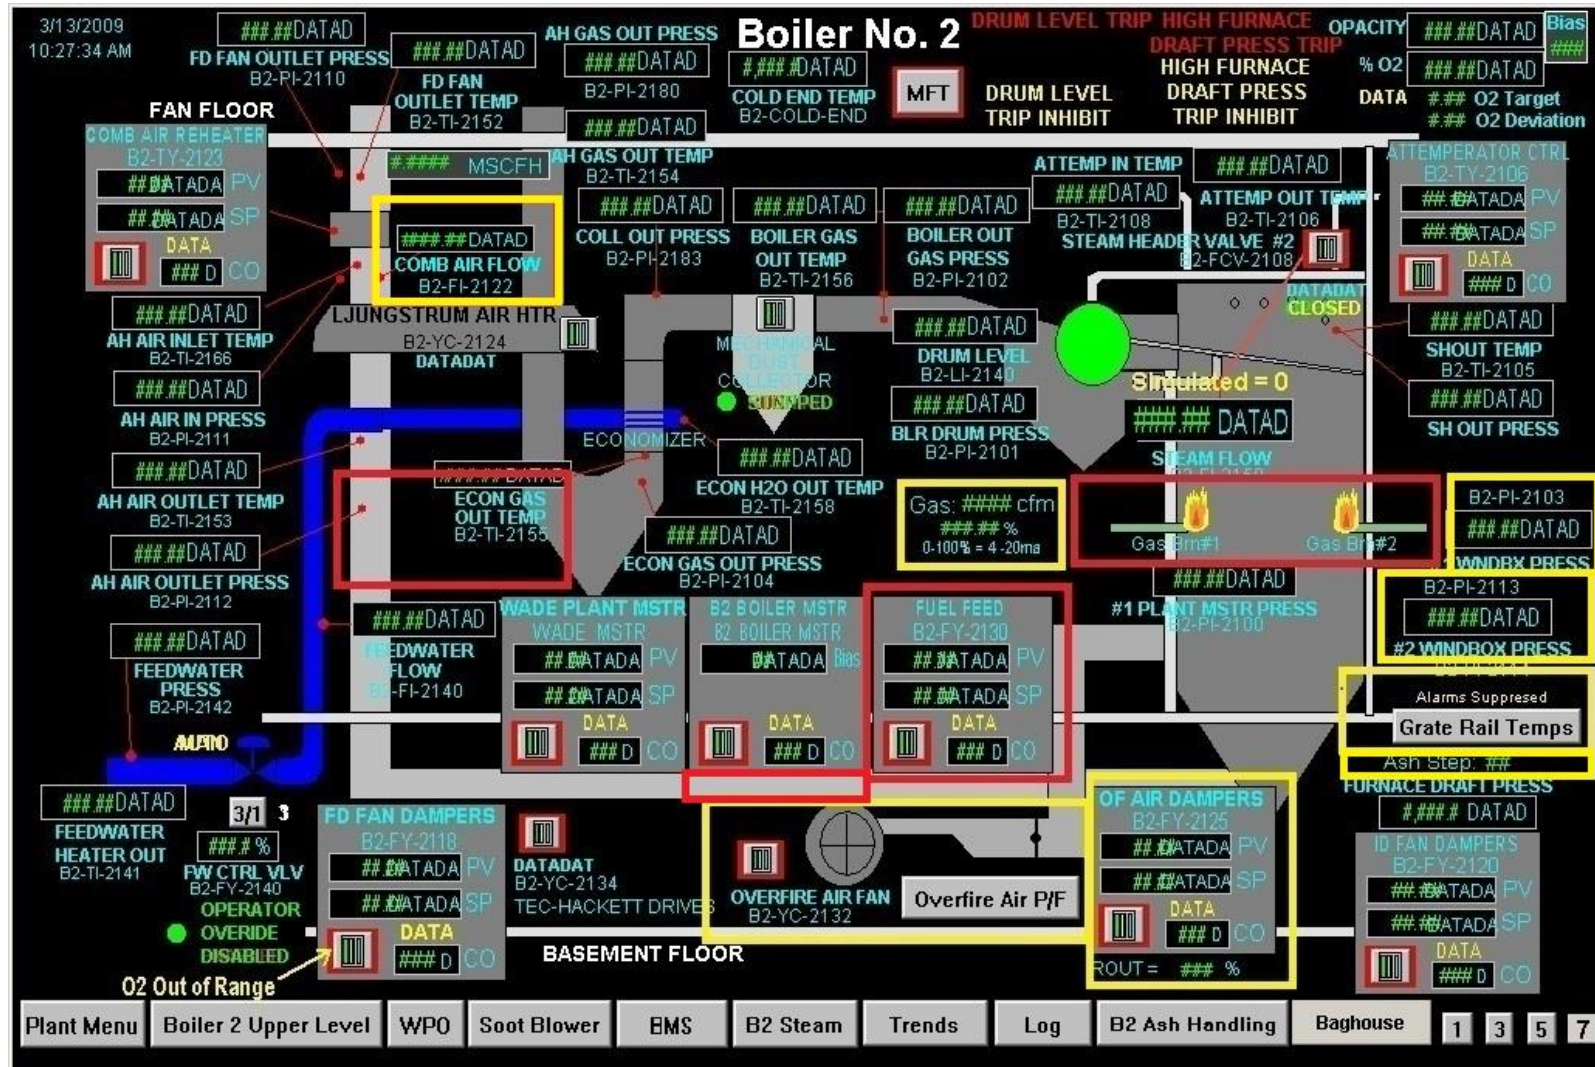

# DCS effect on the HMI

- Early DCS displays lost the big picture
- Control via alarms

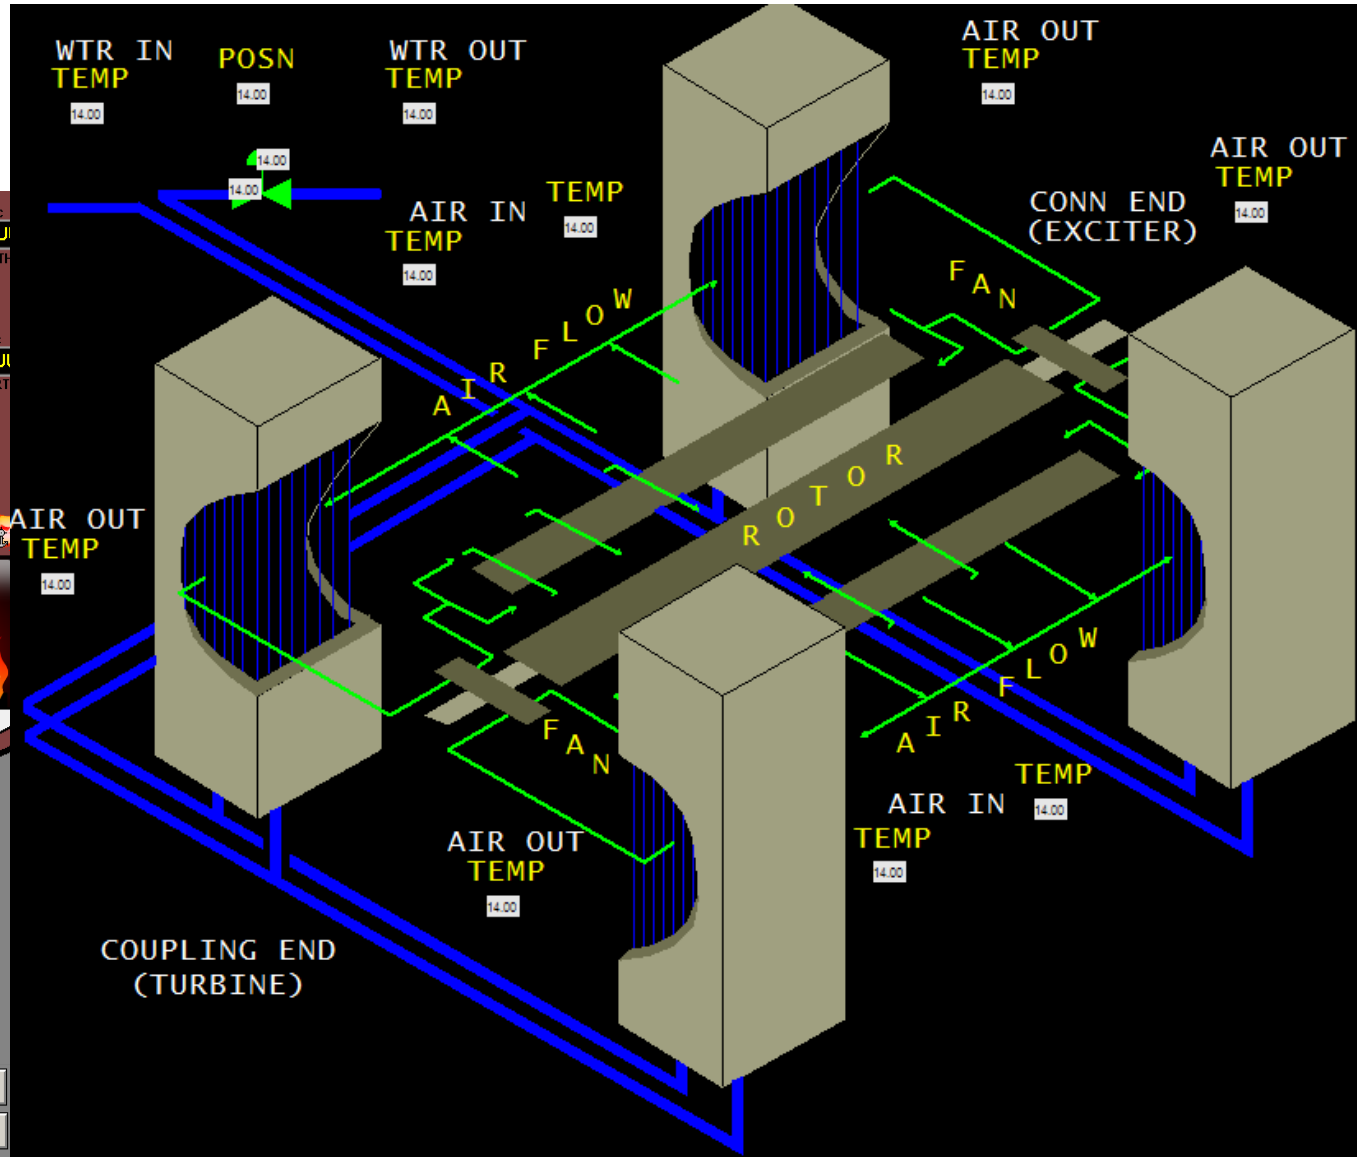

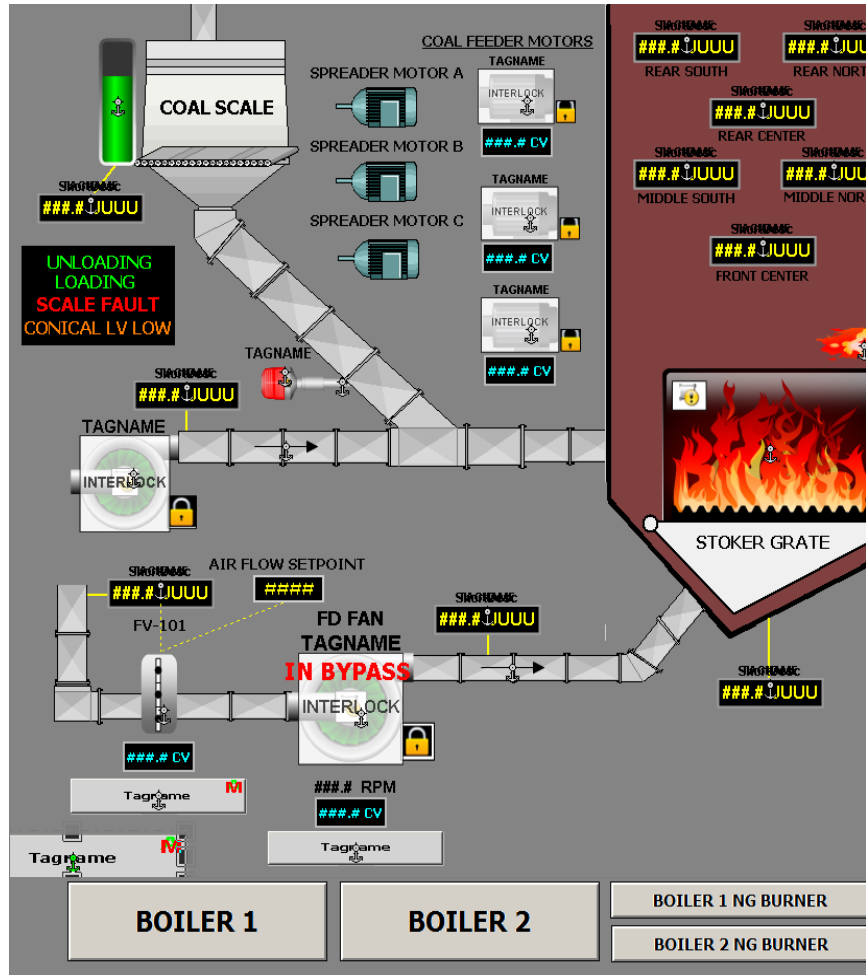

# DCS graphics evolved

Sunday, June 25, 2017

# The HMI Evolves

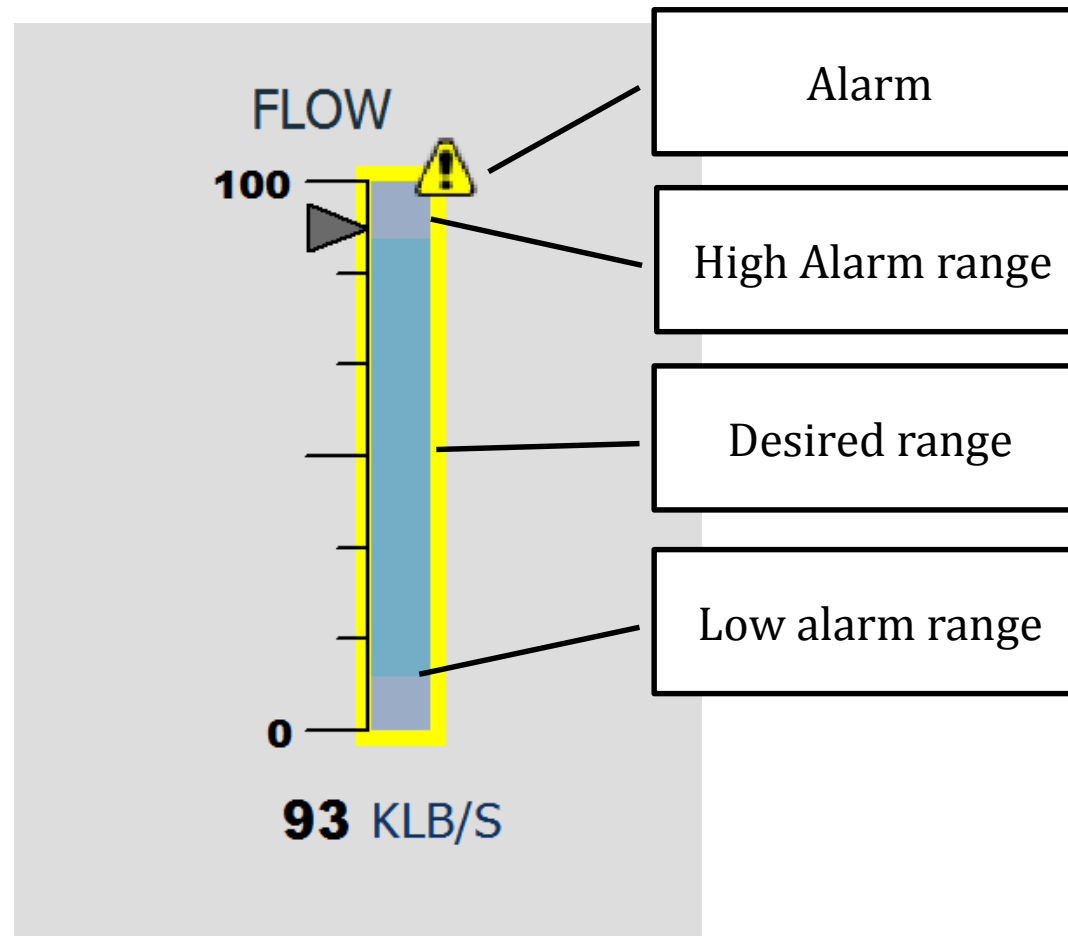

Sunday, June 25, 2017

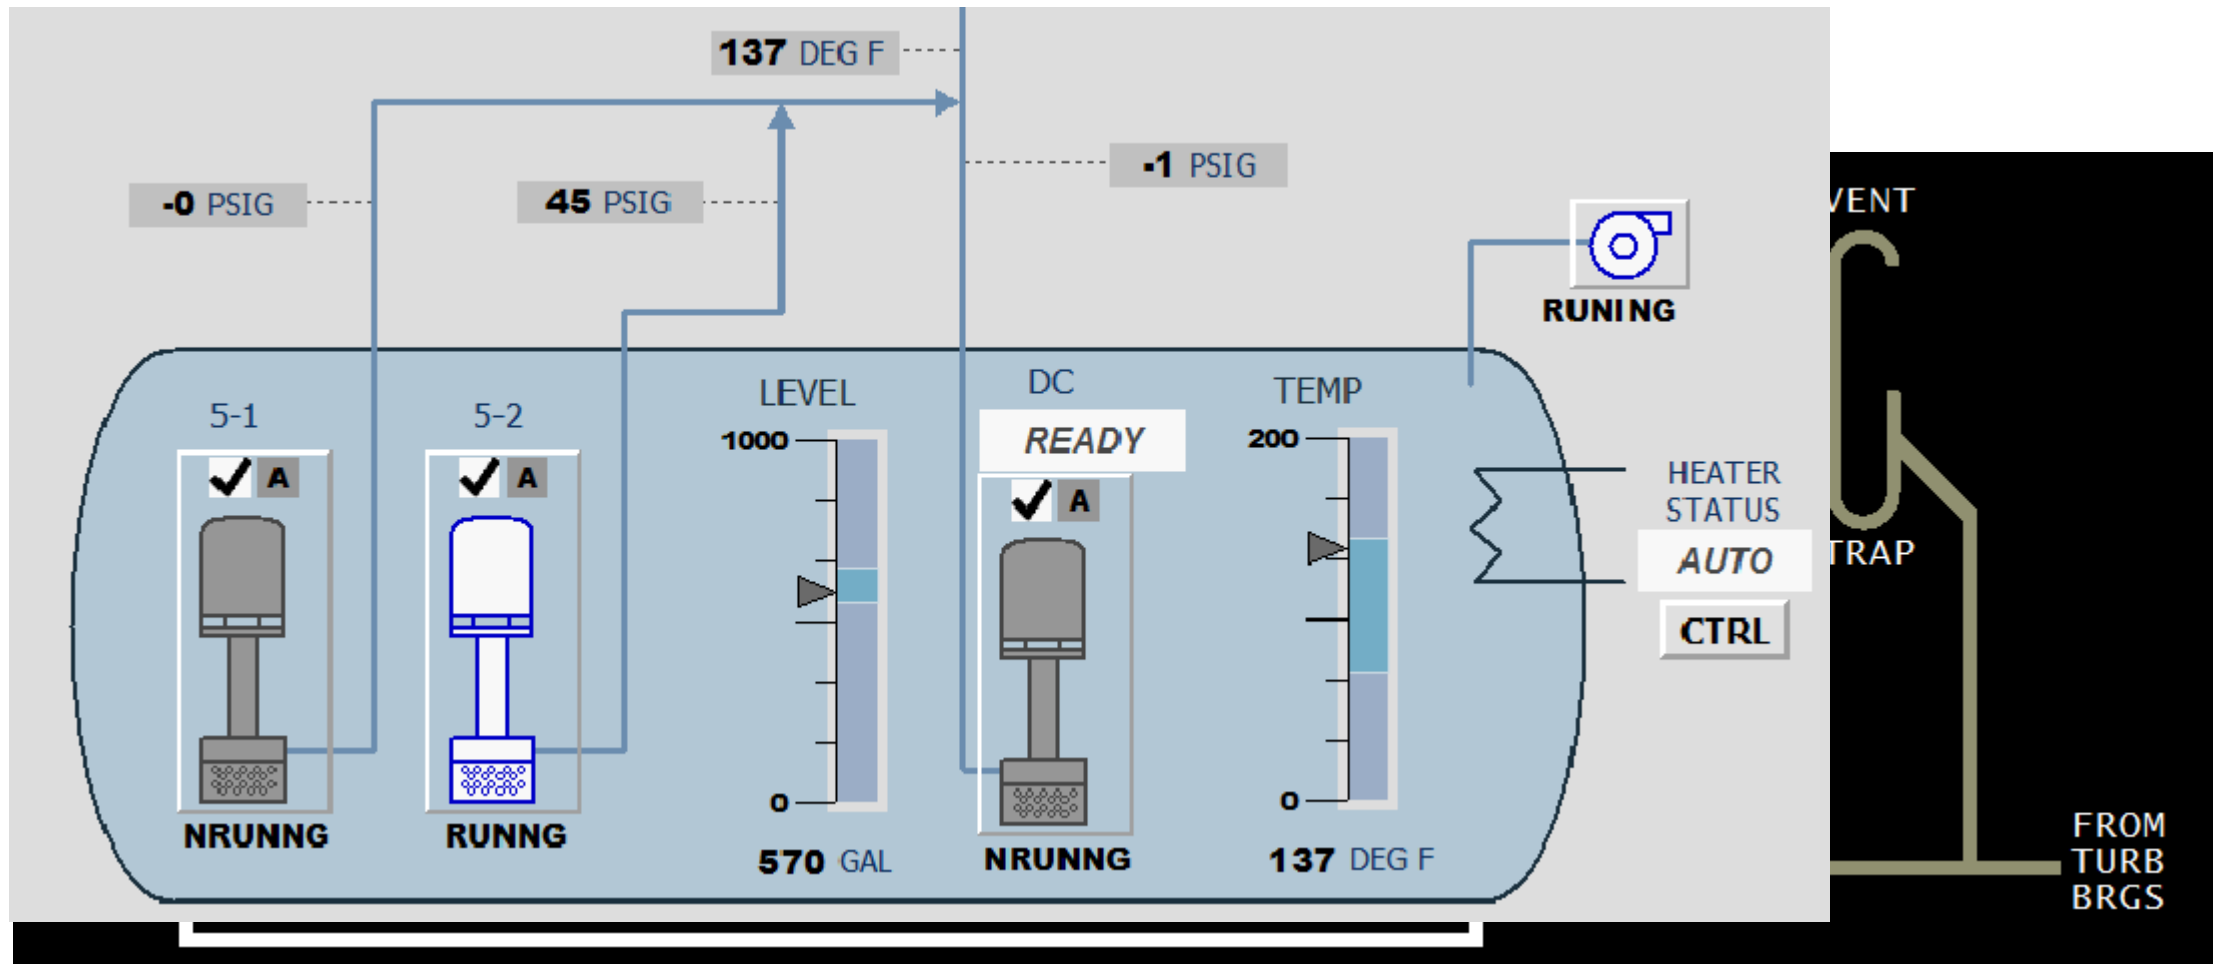

# What's so bad about P&ID based graphics?

- Color use inconsistent and unhelpful
- Trends are relegated to a separate screen
- All data no information
- No way to scan screen and determine state of the plant
- Distracting, low value 3D or animated elements

# High performance: Data in context is information

# High Performance: Data in context is information

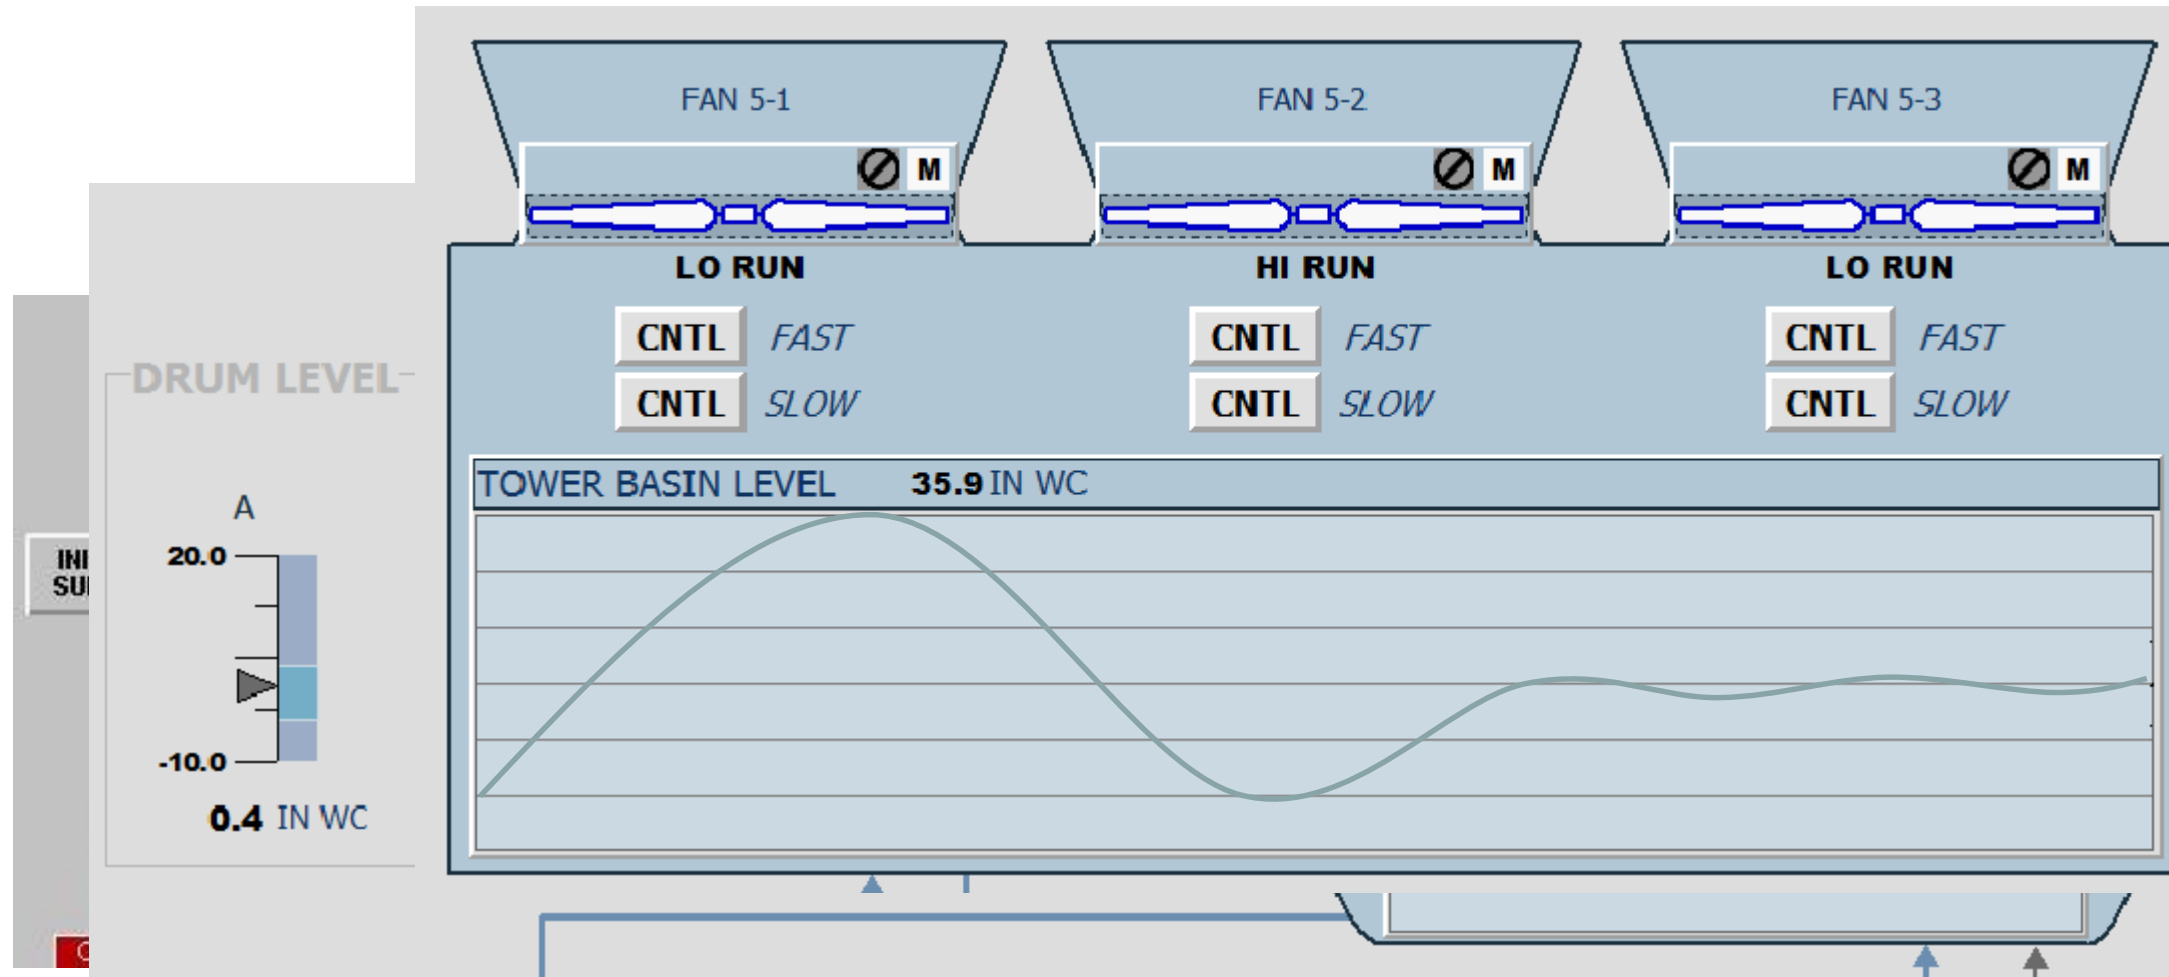

# High Performance: Trends

**Value  
Needing  
Trend**

<b>Current Pressure</b>	<b>Alarm Limit</b>	<b>Shutdown Actuation</b>
235.2 psig	250 psig	300 psig
		

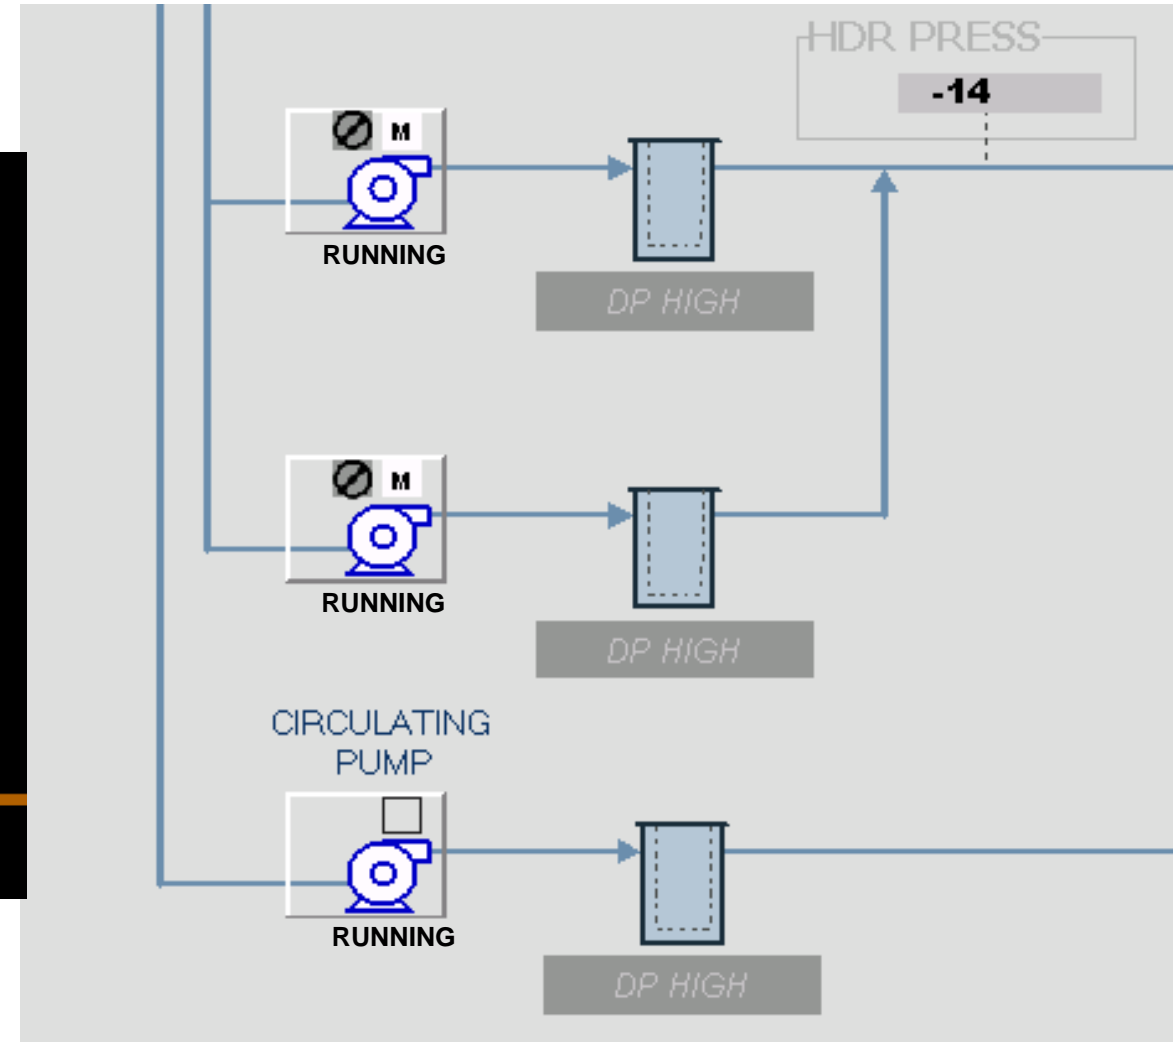

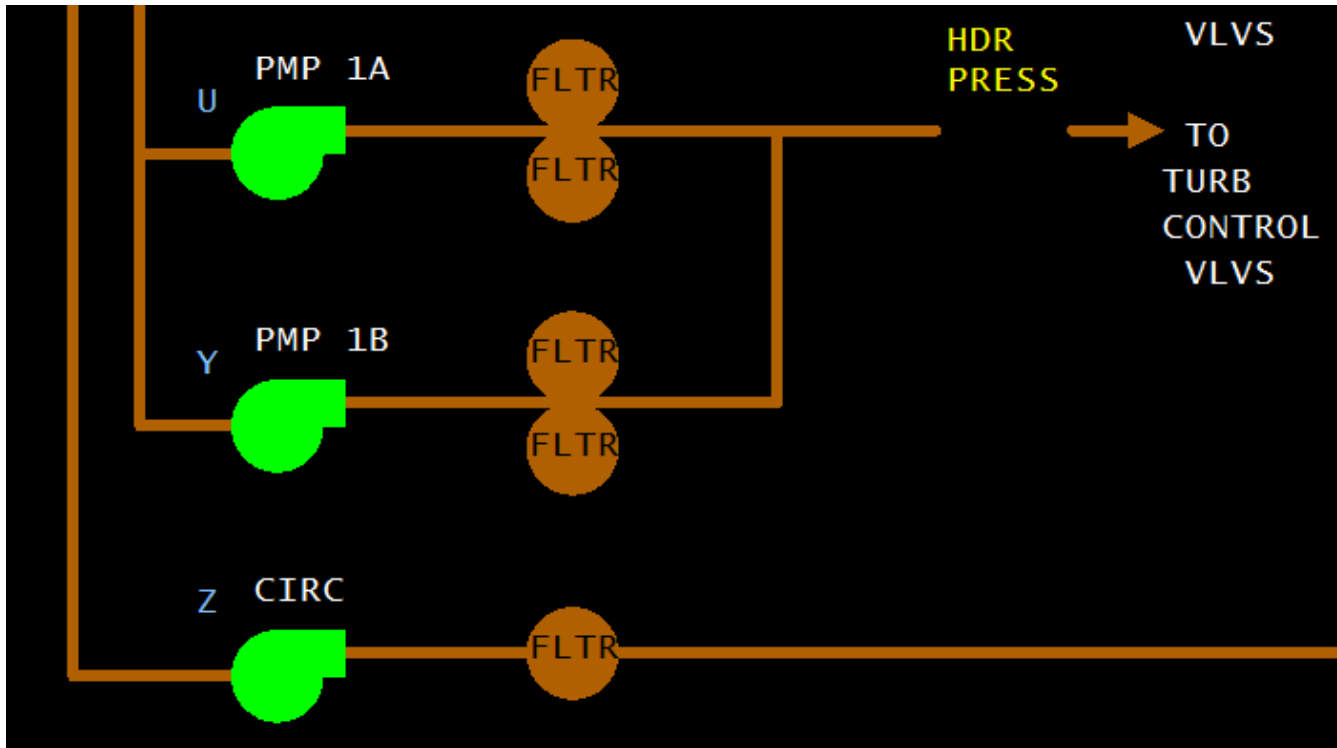

# High Performance: Level example

# High Performance: Use of color

- Gray backgrounds are used to minimize glare and provide low contrast depiction to allow alarms to be obvious
- Bright colors are only used for alarms and abnormal situations
- Colors used for alarms are not used elsewhere

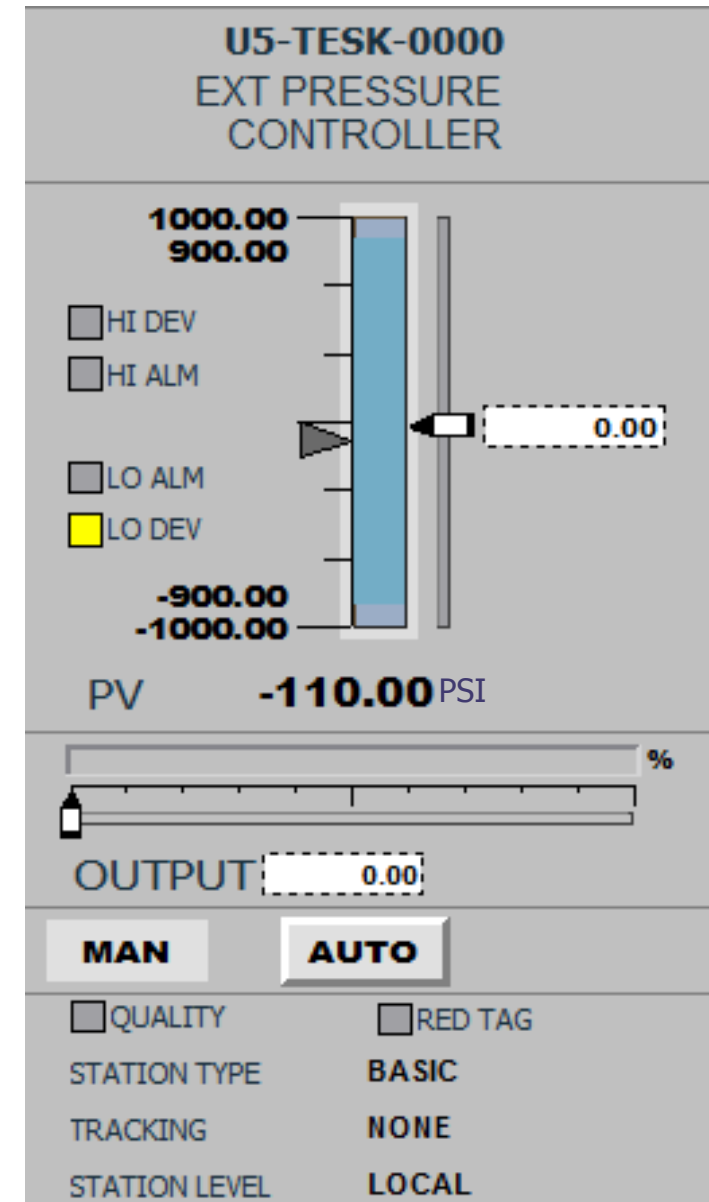

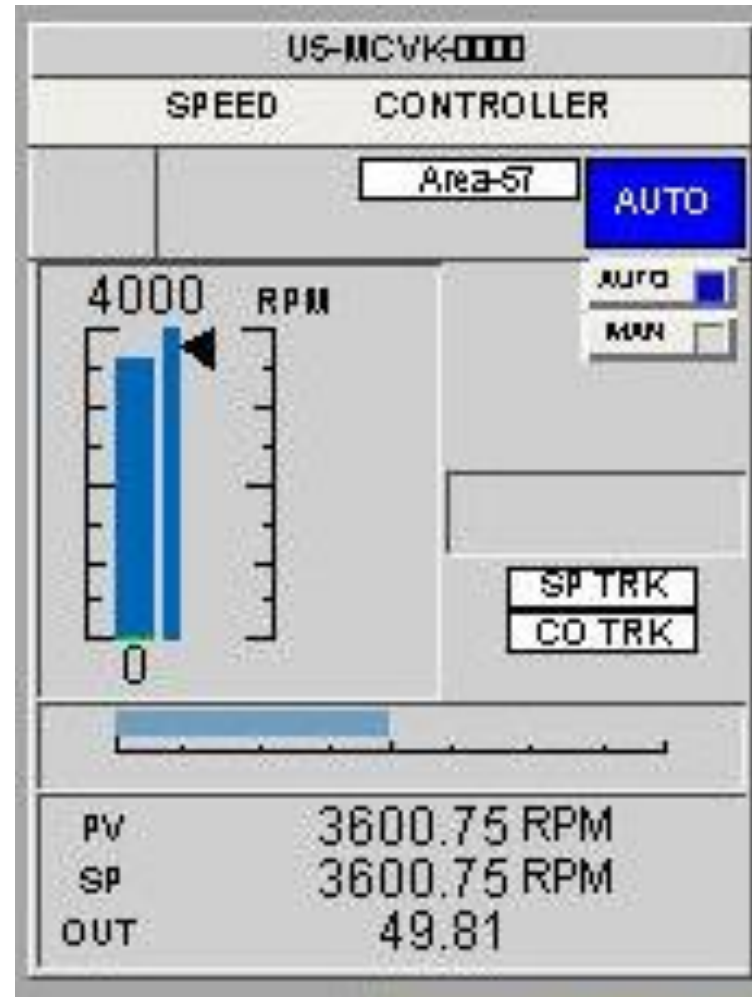

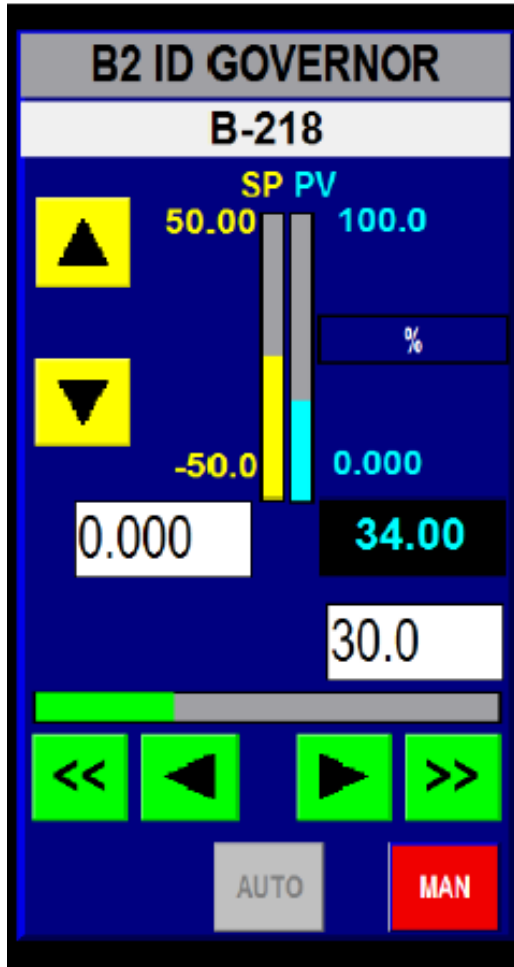

# High Performance: Status indication example

Sunday, June 25, 2017

# High Performance: Faceplates

# High Resolution

- Implemented on 43" - 3840 × 2160 monitors

# High Resolution

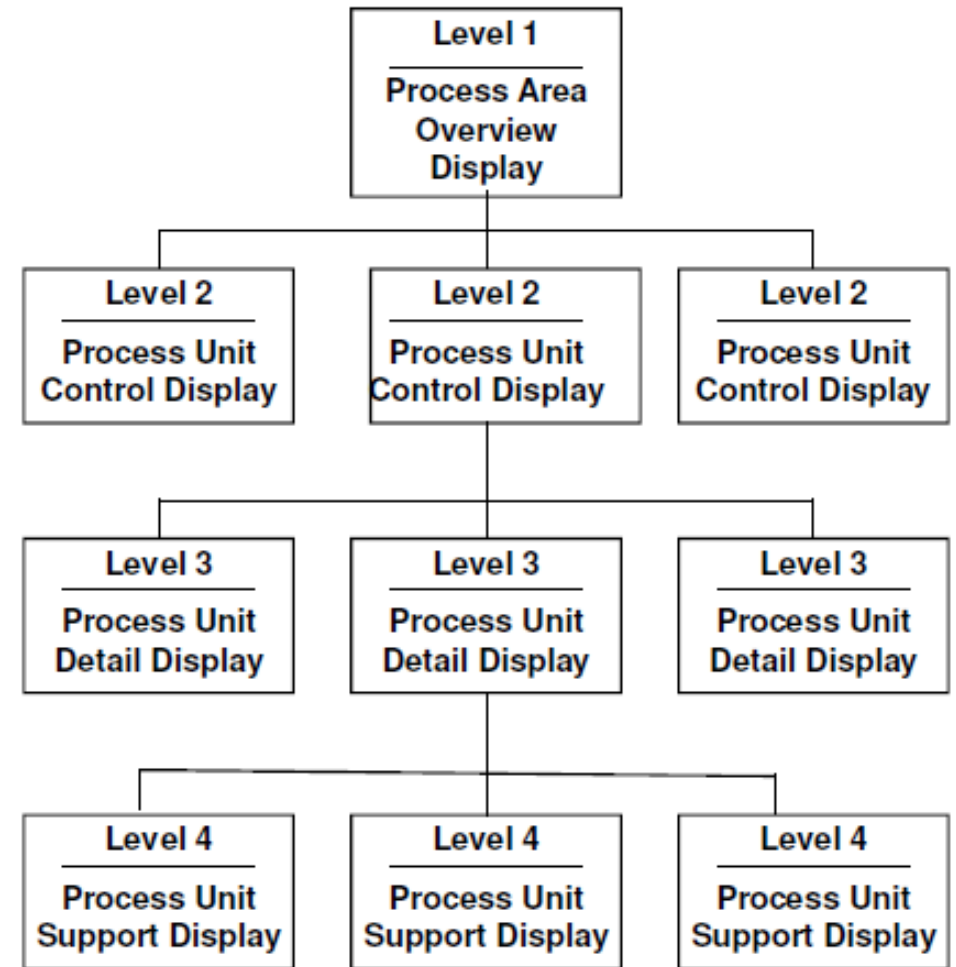

- Each operator will use two

1920 x 1080	1920 x 1080
1920 x 1080	1920 x 1080

1920 x 1080	1920 x 1080
1920 x 1080	1920 x 1080

# HP HMI - Hierarchy

- Level 1 – Process area overview
  - At a glance display
- Level 2 – Process Control Unit
  - Controllers, Values, Alarms, Trends, Status
- Level 3 – Process Unit Detail
  - Small equipment groups
- Level 4 – Diagnostic, Interlocks, First-Outs, Procedures, Documentation

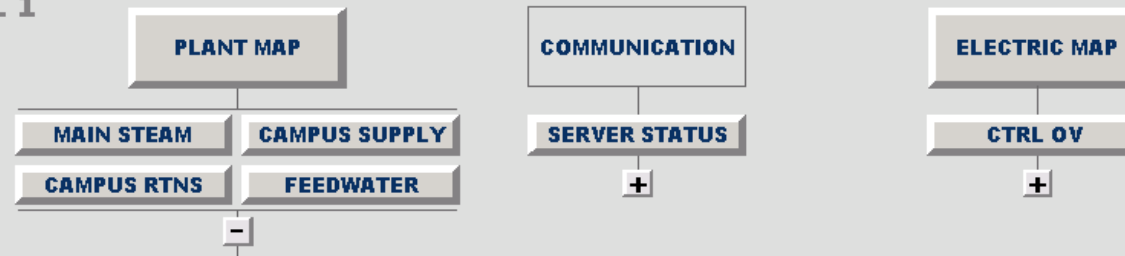

6/9/2017 2:11:38 PM

CLIENT  
PRESETS

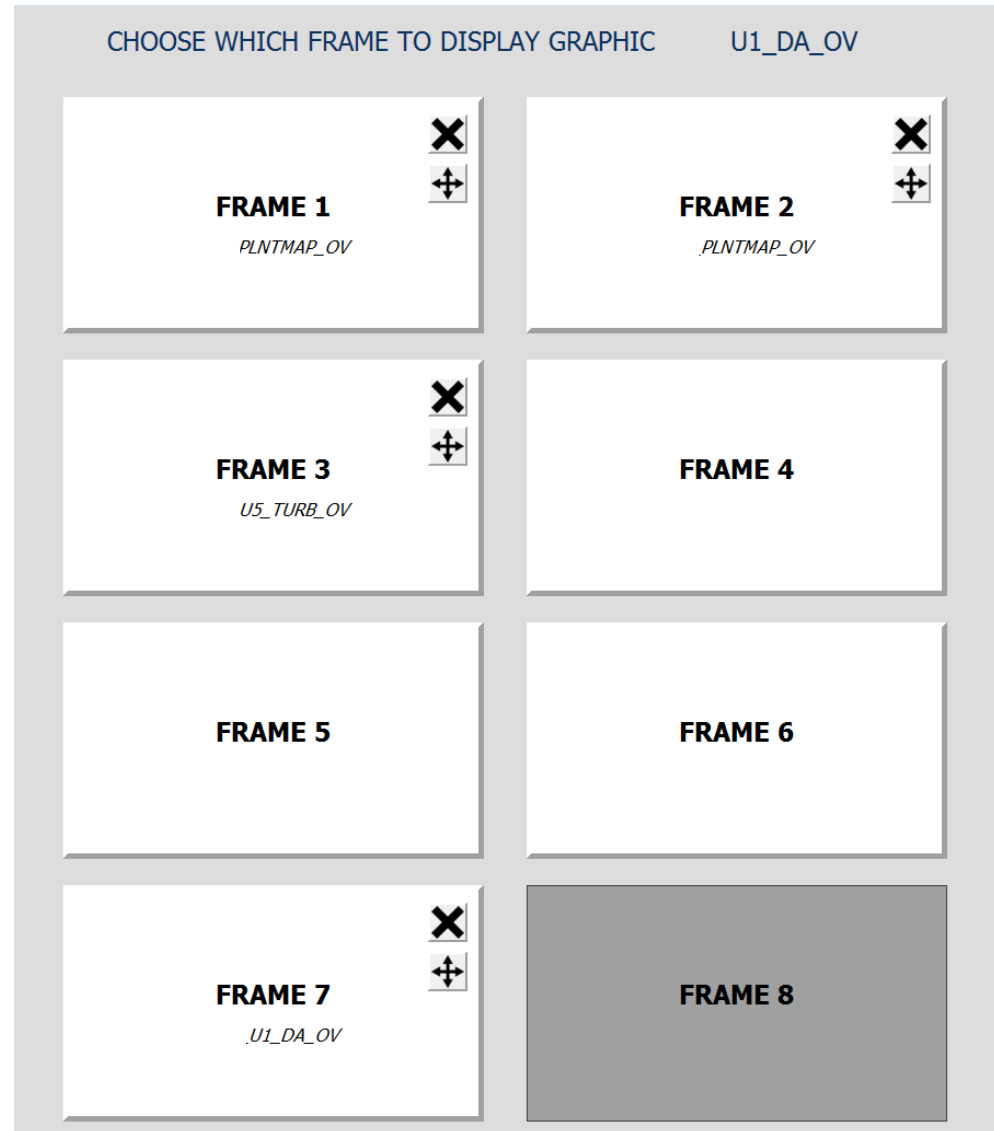

LEVEL 1

Sunday, June 25, 2017

# High Resolution

- Navigation:

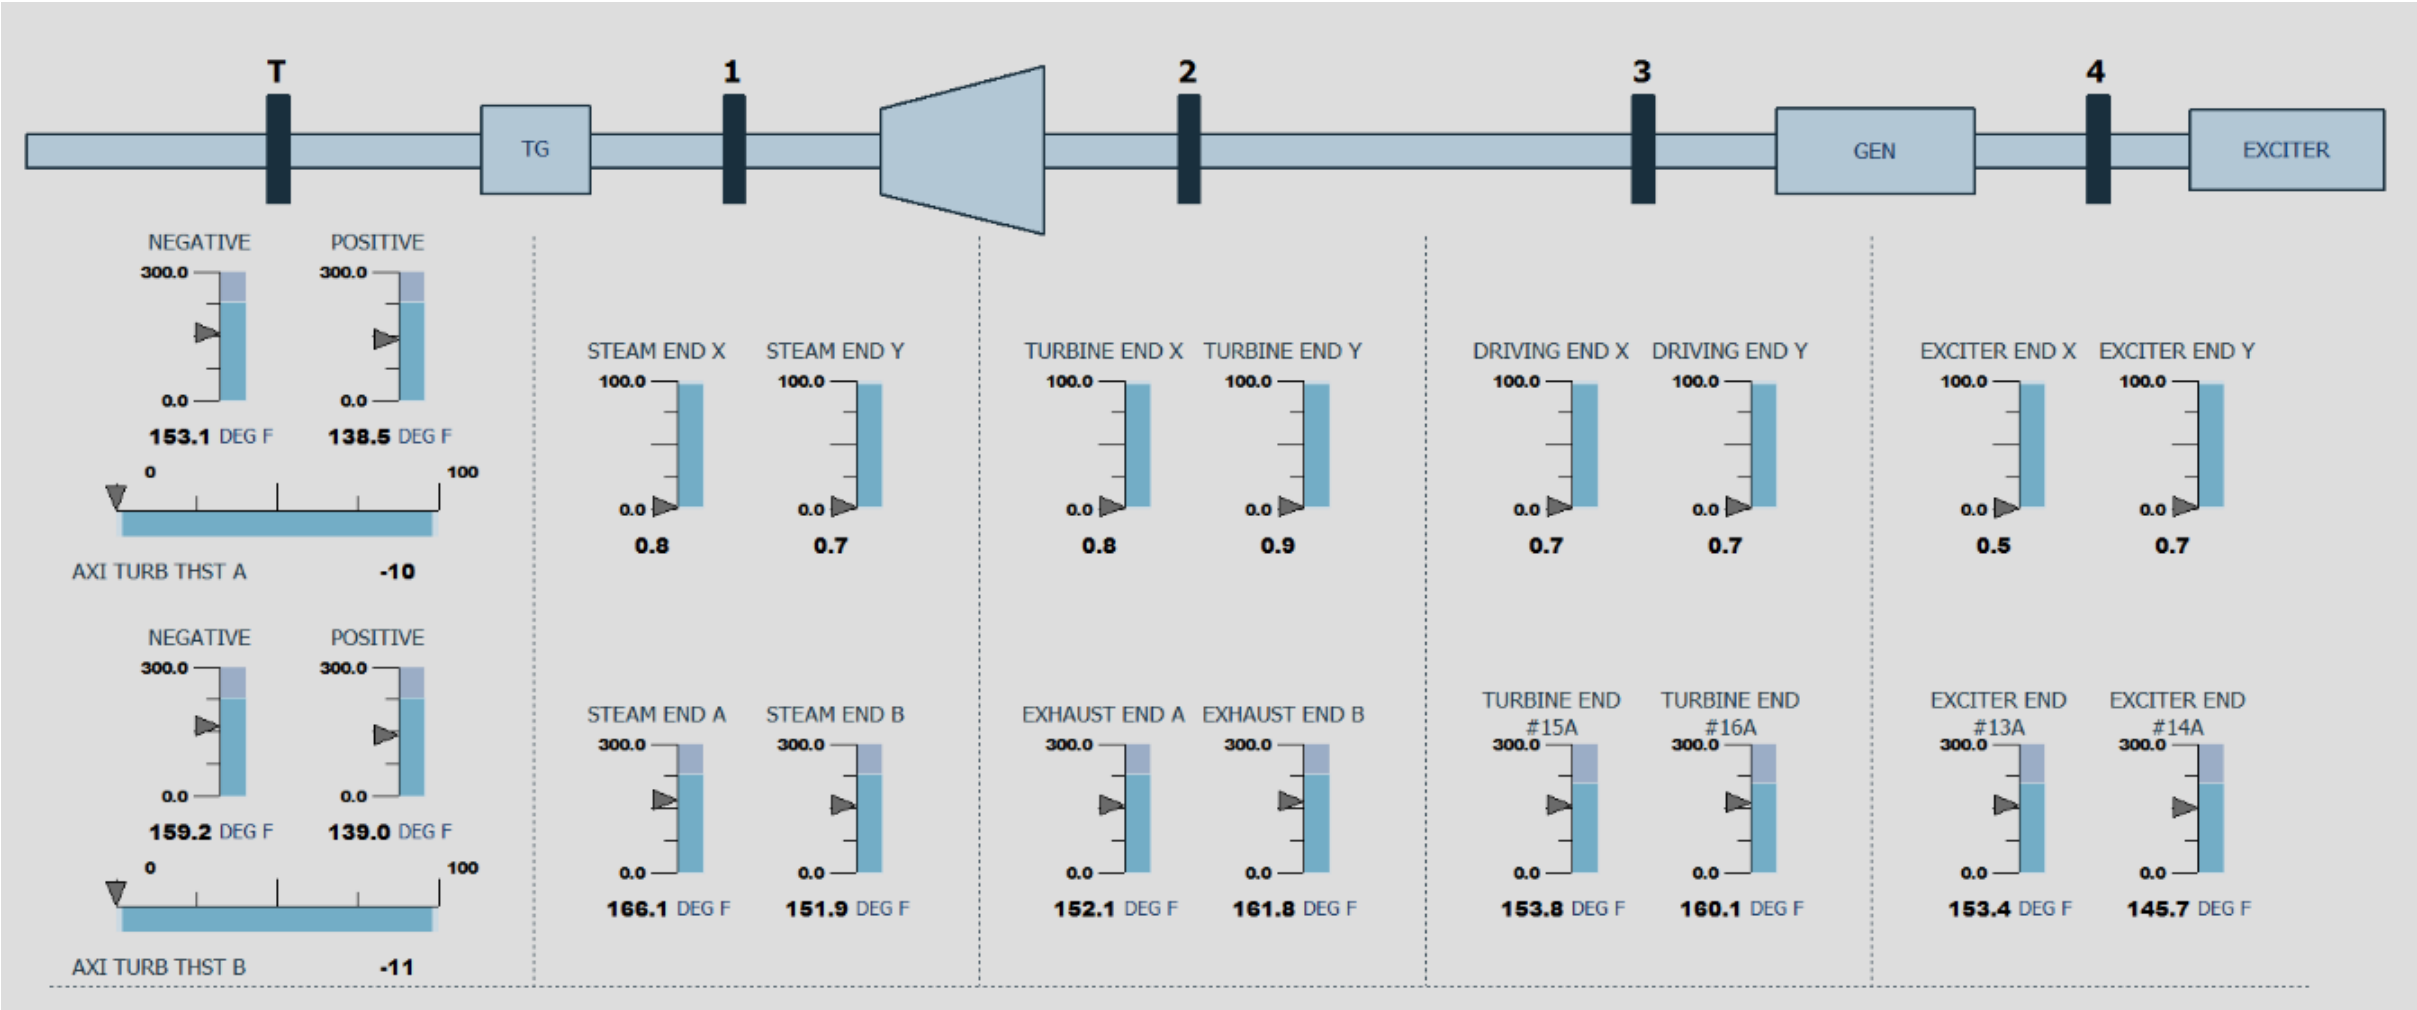

Sunday, June 25, 2017

# Level 1

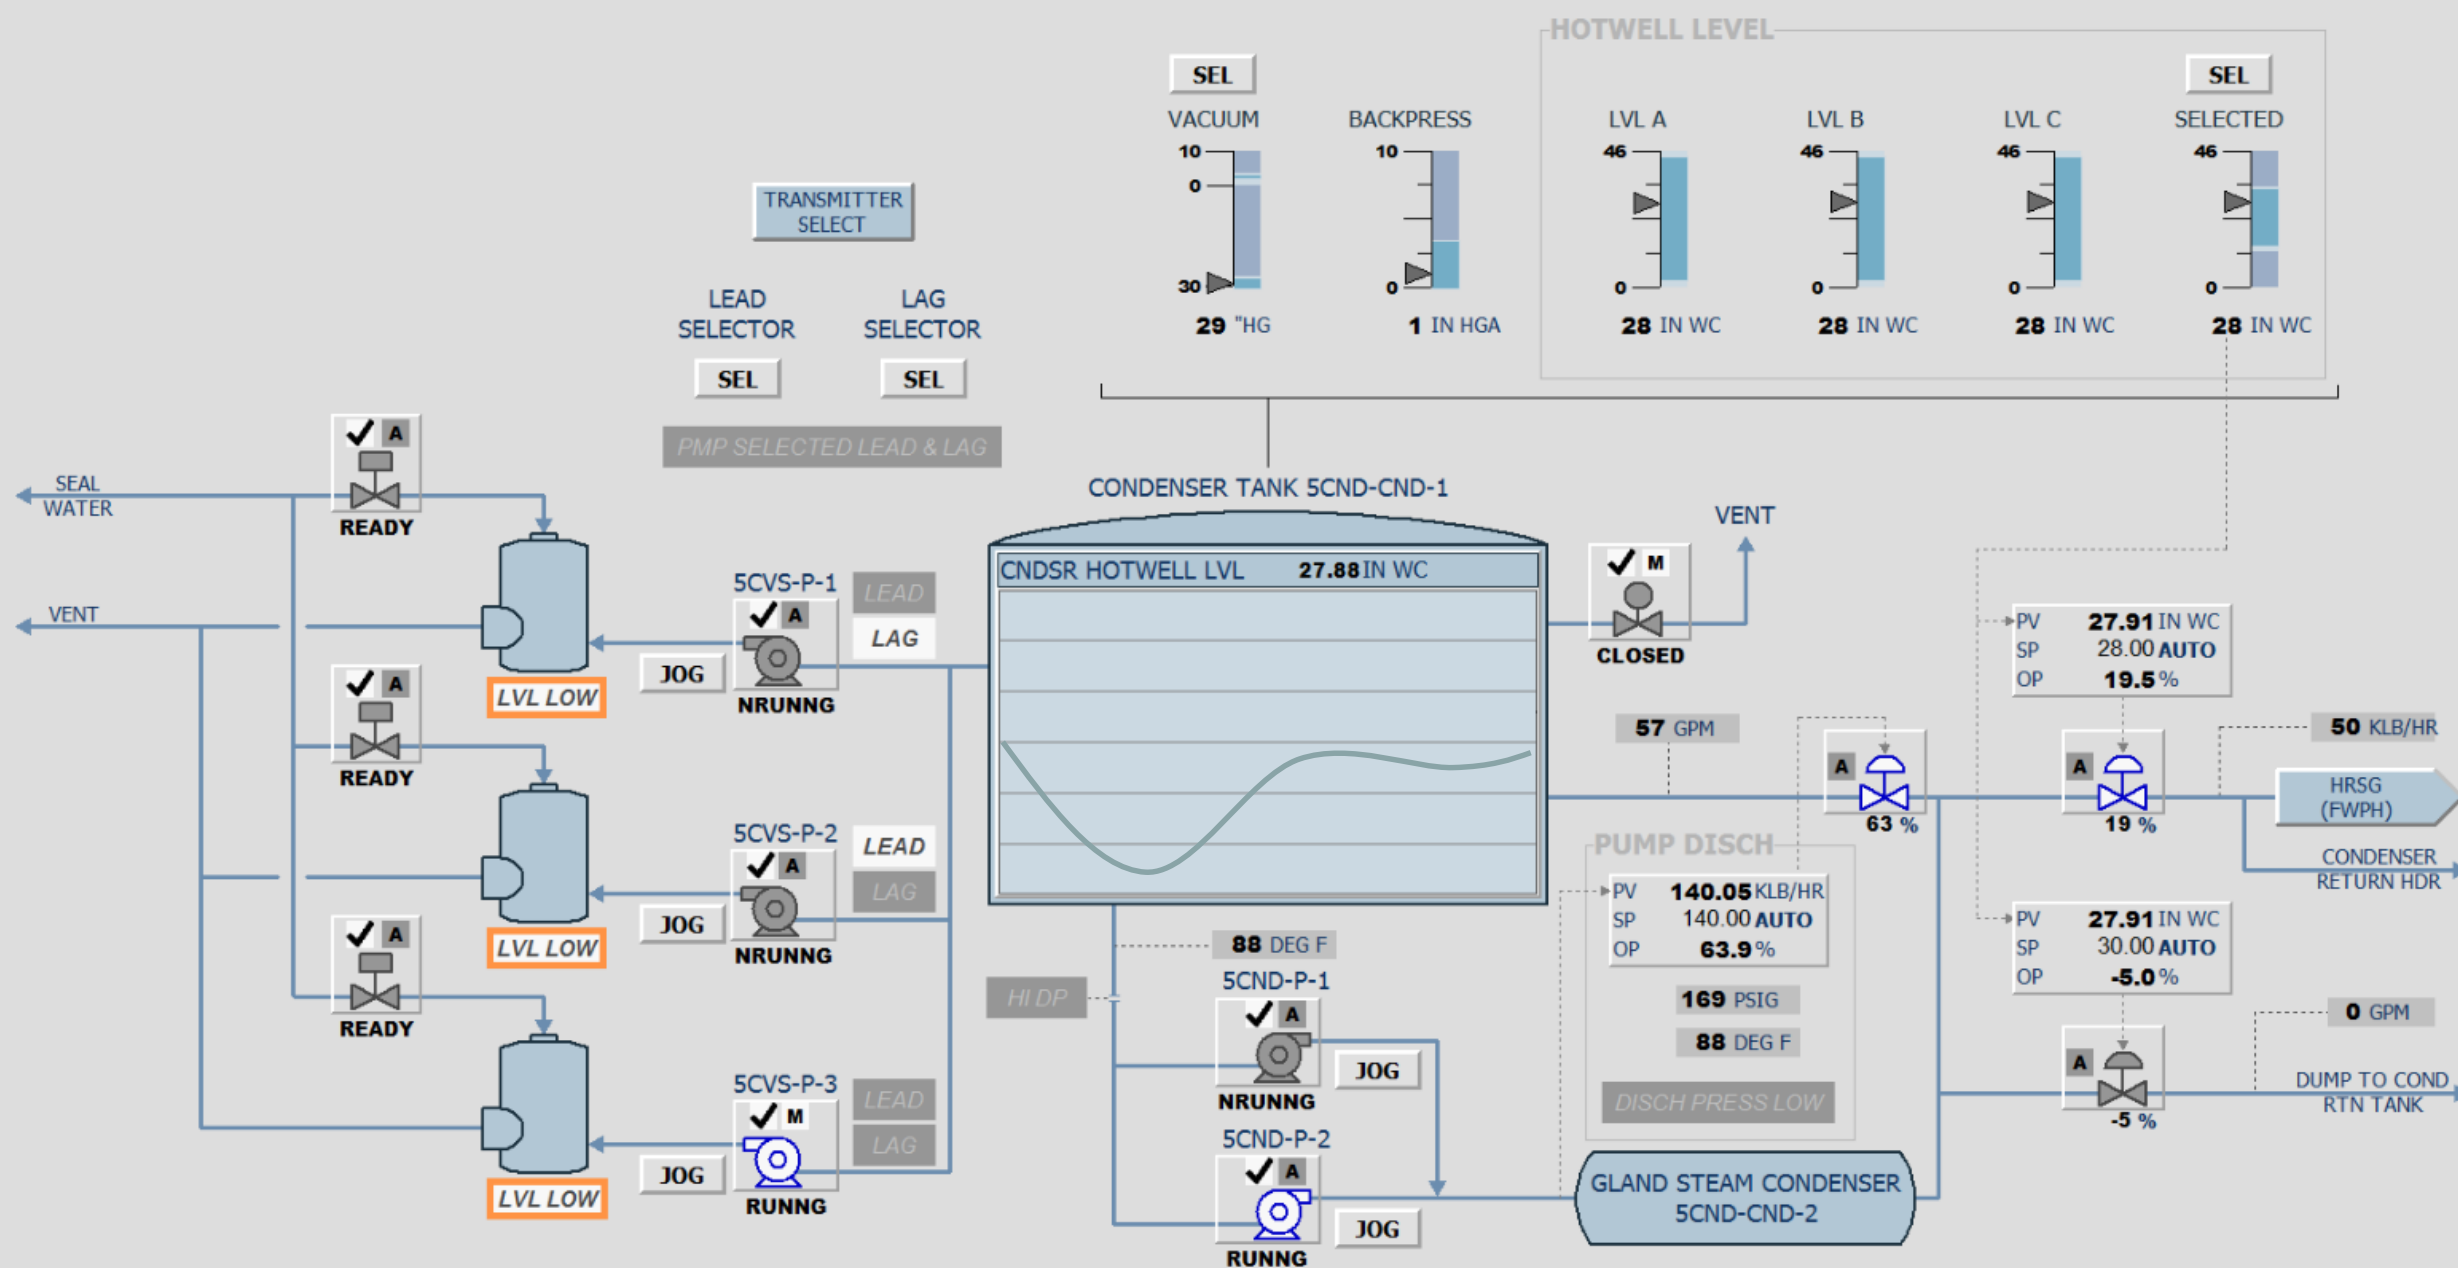

Sunday, June 25, 2017

# Level 2

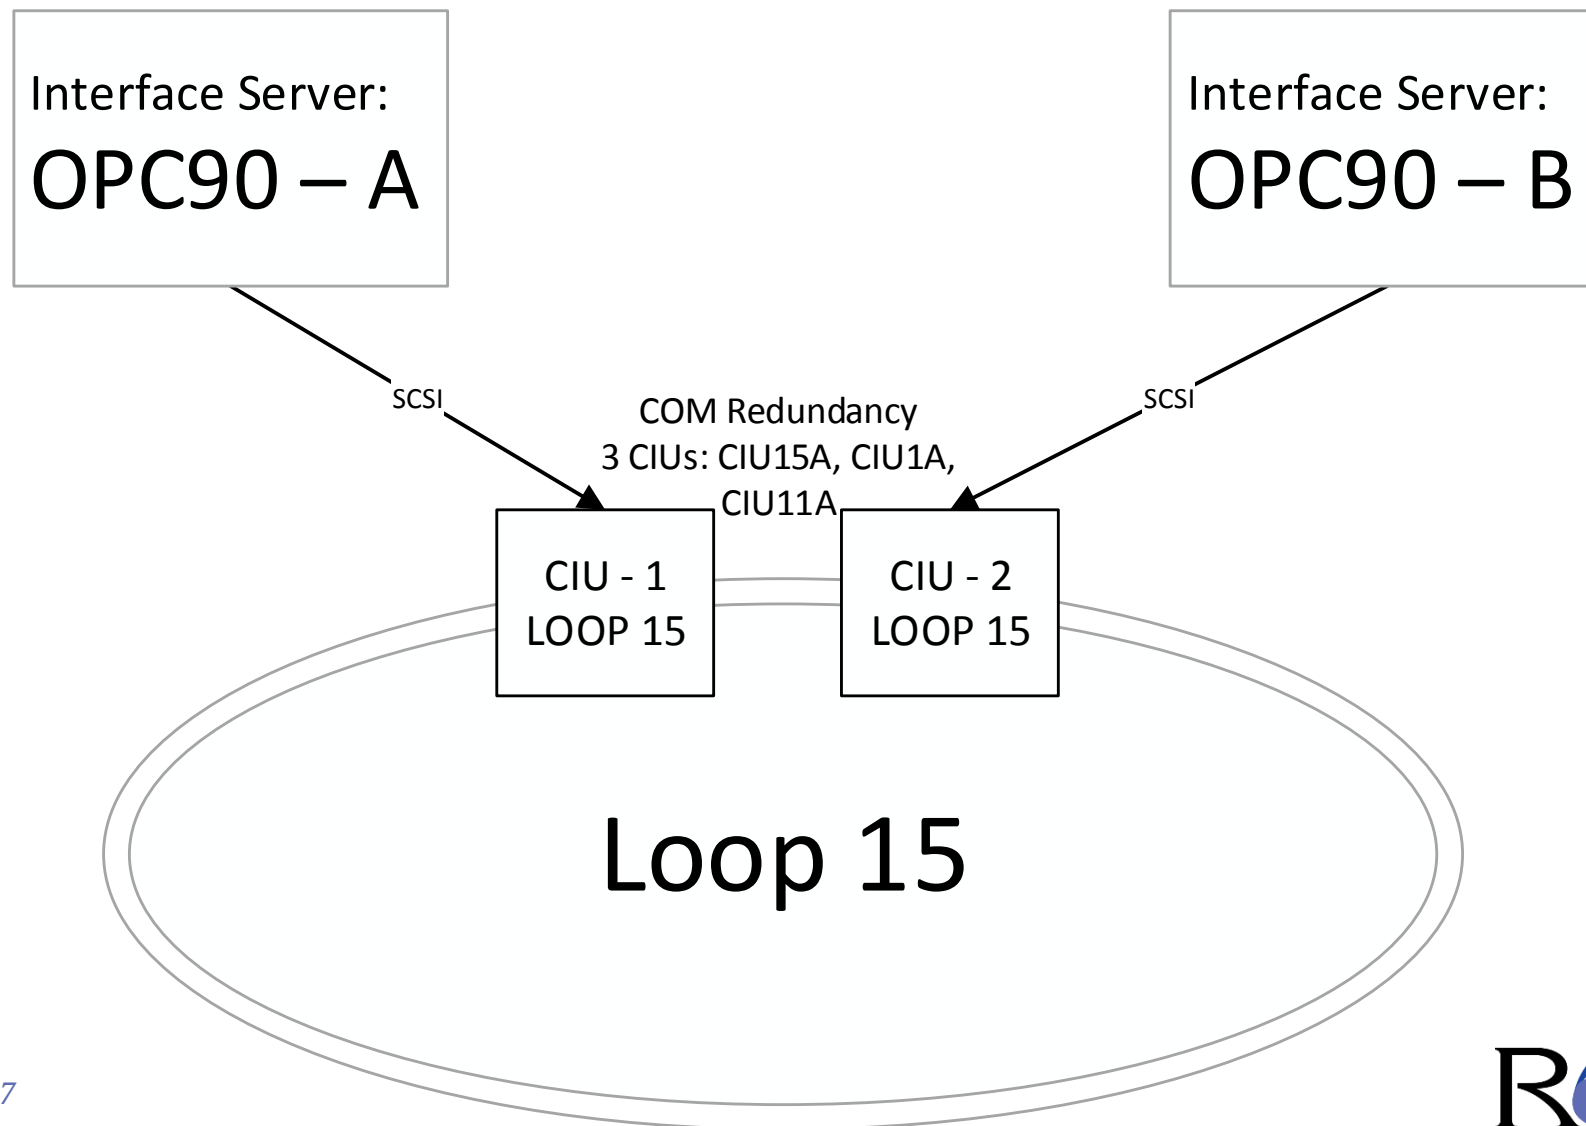

# Level 3

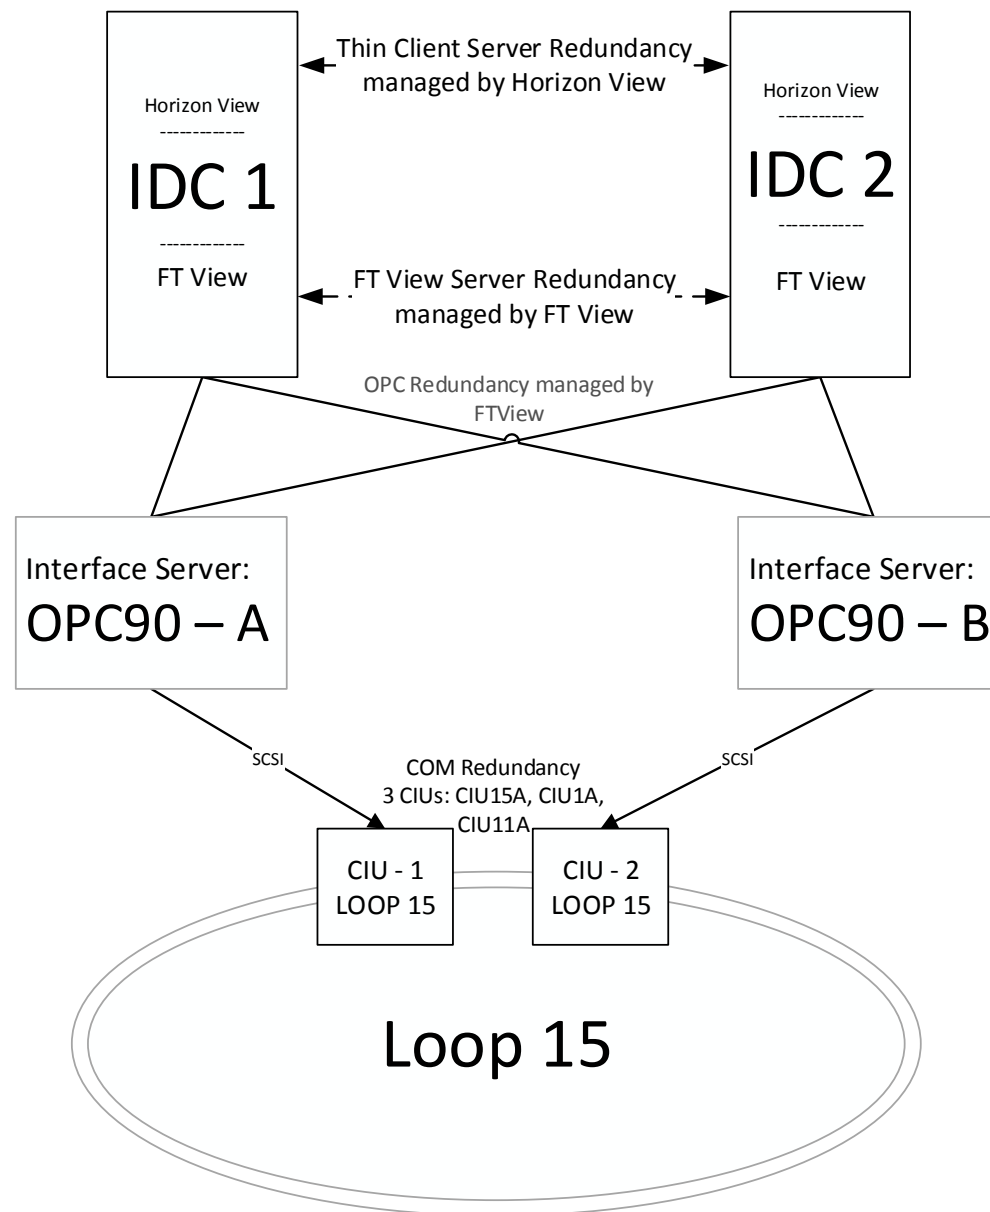

# High Availability

# High Availability

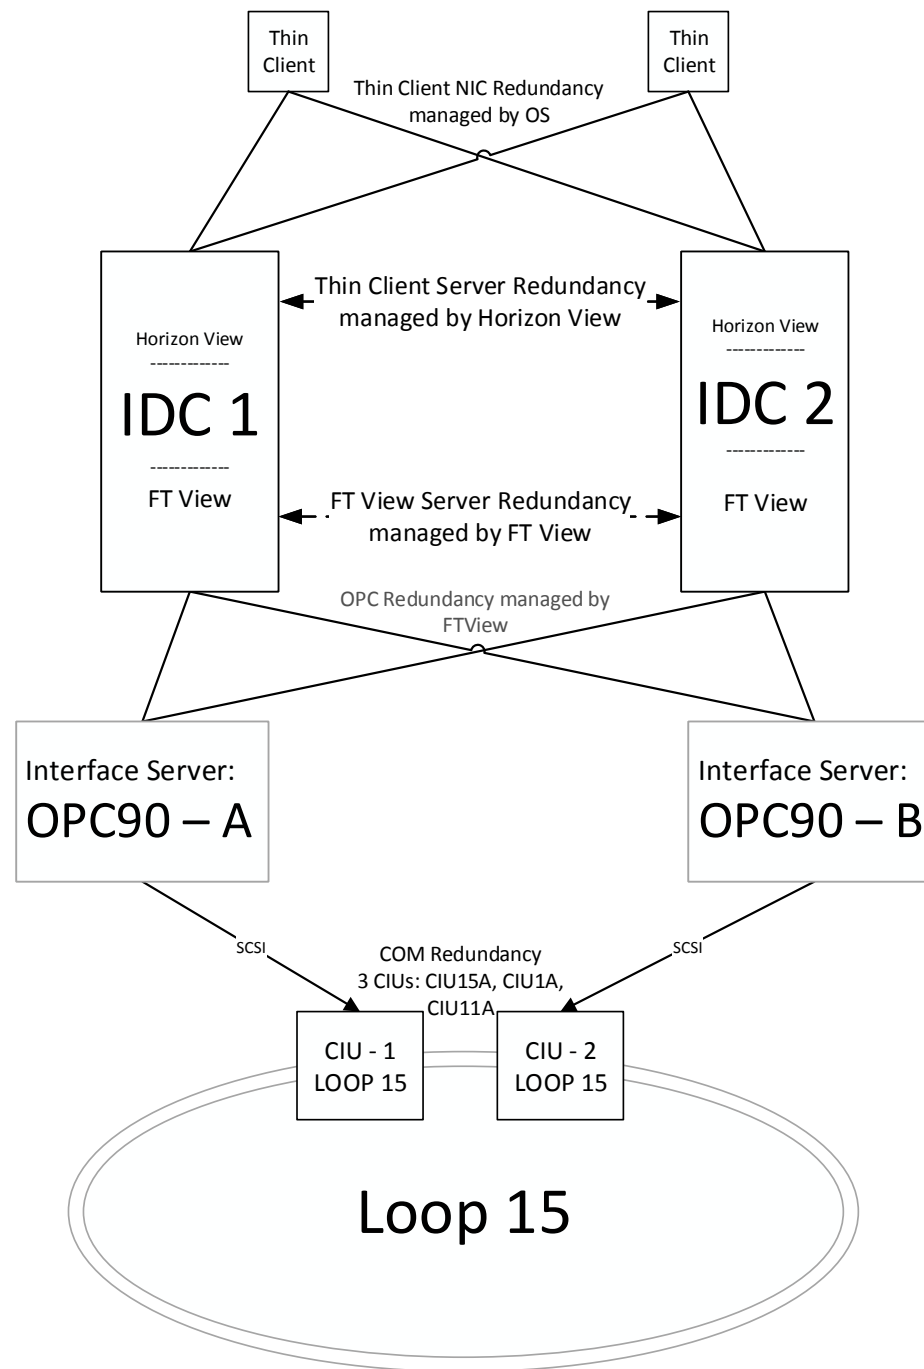

# High Availability

Sunday, June 25, 2017

# High Availability

Sunday, June 25, 2017

# Operator Buy-in

- Operators miss the color
- Project performed in phases
- Solicit feedback throughout and after project

# Wrap-up

- High Performance
- High Resolution
- High Availability
